Hello friendly ERT team. Can you add the following project to the Region 6 Scribe subscription service? Publisher is Corey Bercher of WestonSolutions

Thanks

Subject: RE: Region 6 Gold King ER Data Management Plan

Can you make a back up file and send it to me.

File>Backup Project.

Then send me the .bac.

Also make sure you publish

File>Scribe.net>Publish>Publisher ID – use the dropdown and choose R6.

Send me a note when you have done that.

Subject: Re: Region 6 Gold King ER Data Management Plan

I would remove all the columns after remarks, then filter down to uniques.

It should look something like this below for the samples import

Deliberative Process/Ex. 5

Deliberative Process/Ex. 5

Subject: RE: Region 6 Gold King ER Data Management Plan

Ok I might've gotten it. Think I needed to import the eventID, Locations, analyses, etc individually instead of trying to import all the data at once like my import was set up to do. Looking much better but I haven't checked thoroughly yet.

Sounds like a column mapping issue. Let me give a shot locally.

What version of scribe do you have?

Subject: RE: Region 6 Gold King ER Data Management Plan

Yes unfortunately it's not pulling in properly. In the import preview shows all fields pulling through normally, but once it's in SCRIBE Sample Date, EventID, Location, Matrix and Sample Type fields appear as nulls.

Ah good catch. Did you check in Scribe if it looks good after import?

Nevermind I figured it out. My tag was not unique which was causing it. I assume I can just start at 1 and increment for each analysis?

Hello again,

Attached is what I currently have for a SCRIBE import for yesterday's samples based on the template you sent me.

Please review and let me know if it looks good or not. I've never imported sample data into SCRIBE before, but I think I figured out what the premise is unless I'm just totally wrong haha. I will start appending the sample info from today after I send this.

Also, I was just starting to walk through the new SCRIBE project wizard, but I am unsure what the site number is or where I could find it. Any help on this would also be appreciated.

Thanks,

Corey

Corey,

Can you start the R6 SCRIBE Project? Do you need help to get started or have you done it before.

Use the VVLs outlined in this DMP for the fields called out in the DMP and the field sample information collected by the teams.

Let's build a Water sampling template for you to use to import all the information easily into SCRIBE at the end of the day.

Attached is a good starting point for an import template.

Fill this out with yesterday's sample data and send back to me for review before importing it into SCRIBE. We need to get these in today and publish. We will start having analytical data to load tonight or tomorrow.

Let me know as you have questions.

Thanks. Janine

Eric, for your review.

This is the R8 one with R6 adjustments based on our current field efforts and data repositories we use.

Kris this is the one you should maintain for the region as new ops and data streams get added and address any of Eric's comments.
